

Elevator Predictive Maintenance Report

ElevatorAI Predictive Maintenance System

Report Information

Elevator ID: EL-TEST-001

Report Date: 2026-07-28 23:42:12

Report Type: Prediction Analysis

Version: v1.0.0

Prediction: Healthy

Healthy: 100.0%

Maintenance: 0.0%

Failure: 0.0%

Confidence: 100.0%

Risk Level: 0.0%

Estimated RUL: 155 days

Sensor Readings

Motor Temperature:	65°C
Ambient Temperature:	30°C
Humidity:	55%
Vibration Level:	Medium
Motor Current:	14.5A
Power Consumption:	9.8kW
Running Hours:	12000hrs
Door Open Count:	75000
Load Weight:	600kg
Cabin Speed:	1.5m/s
Brake Condition:	Good
Bearing Condition:	Good
Last Maintenance:	120days ago
Sensor Health Score:	75%
Error Code:	E000

Maintenance Recommendations

[LOW] Continue routine maintenance schedule

Reason: Elevator is operating normally. Maintain regular service intervals.

[LOW] Log sensor readings for trend analysis

Reason: Consistent monitoring helps detect gradual degradation early.
